dubbo应用配置monitor监控地址

在监控配置上，选择了使用注册中心发现的方法；

介绍几种方式

1、properties属性配置

```
##监控
dubbo.monitor.protocol = registry
```

2、XML配置

```
<!-- 监控 -->
<dubbo:monitor protocol="registry" />
```

3、编码配置

```
@Bean
 public MonitorConfig monitorConfig() {
  MonitorConfig monitorConfig = new MonitorConfig();
  monitorConfig.setProtocol("registry");
  return monitorConfig;
}
```

原始API文档http://dubbo.apache.org/en-us/docs/user/references/xml/dubbo-monitor.html

dubbo:monitor

Monitor center configuration. The corresponding class: `org.apache.dubbo.config.MonitorConfig`

Property	The corresponding class	Type	Requisite	Default	Effect	Description	Compatibility
